

PDF Accessibility: CommonLook™ for Adobe Acrobat

Making PDF documents accessible to people with disabilities is a unique challenge. CommonLook™ for Adobe Acrobat makes the task easier and more effective.

Automatic Fixes for Common Problems

CommonLook™ fixes common PDF issues such as run-together text and repeated characters.

Section 508 Checklist

Wizard-like tool guides you through checking and correcting images, colors, and data tables.

Table Tool

Fixes complex tables, identifies header cells and data cells and displays how tables are divided into rows and columns. Easily generates "speak text" for multi-header tables.

Logical Structure Editor

Powerful, visual tool makes fixing PDF content, order, and tags easy; Allows easy identification of structure including headings, lists, and forms.

Compliance Report

Provides a record of testing.

Adobe has made great progress in making PDF accessibility possible. However, the process of making PDF documents accessible using Adobe Acrobat is complicated and confusing, at best.

Creating accessible PDF content is now much easier with CommonLook™ Section 508 for Adobe Acrobat from NetCentric Technologies. CommonLook automates most of the process of checking documents and greatly simplifies the steps needed to repair them.

Until now, making PDF documents accessible required intimate knowledge of the underlying – and often unintuitive – structure of PDF documents. CommonLook enables PDF authors and accessibility testers to check and fix PDF documents without having to work with the "tags tree" or other internal structures and without having to go back to the source document.

More Information

As a NetCentric partner, MSF&W Accessibility Solutions offers CommonLook™ for Adobe Acrobat as well as training and custom support services to help you address PDF accessibility in your organization.
