

Accessibility Training

Whether you want to learn the basics of accessibility, brush up on what you already know, or become skilled at advanced accessibility techniques, MSF&W can help get you there.

Our expert trainers provide courses that can teach you how to create accessible web pages, applications, PDF documents, forms, and multimedia.

MSF&W's trainers have been teaching hands-on accessibility classes for almost ten years. We use a combination of interactive demonstrations and hands-on exercises to make sure you really understand what you learn.

Most of our classes include demonstrations of assistive technology tools – there is simply no substitute for seeing and hearing these tools in action – or for using them to test your own work.

We offer classes for beginners as well as experienced developers, and we are happy to tailor our classes to meet your needs.

More Information

For more information about our accessibility training programs, please call (217) 698-3535, email accessibility@msfw.com, or see www.msfw.com/accessibility.

Courses

- **“Achieving Accessibility” Executive Overview**
The basic what, why, and how of accessibility for managers, developers, and content creators. No technical experience required.
- **Building Accessible Web Sites with HTML & CSS**
“Accessibility 101” for new web developers.
- **Building Accessible Web Applications**
Advanced accessibility for experienced developers.
- **Testing for Accessibility**
How to use assistive technologies to test your work.
- **Creating Accessible PDF Documents**
Using Microsoft Word to create accessible PDF.
- **Repairing PDF Documents with CommonLook™**
Using NetCentric's CommonLook for Adobe Acrobat to test and repair inaccessible PDF documents.
- **Creating Accessible PDF Forms with Adobe LiveCycle Designer**
The right way to create accessible PDF forms.
- **Creating Accessible Multimedia Training with Adobe Captivate**
Using Adobe Captivate to create computer-based trainings with closed captions, keyboard support, and screen reader compatibility.
